

Mapping the proposed BSSS PLOS to the QF Emirates (level 7)

PLOS	QF Emirates Level 7
<p>PLO1: Identify and Illustrate the concepts and principles of security and strategic studies. (Understanding and Application)</p>	<p>Knowledge</p> <ul style="list-style-type: none"> » specialized factual and theoretical knowledge and an understanding of the boundaries in a field of work or discipline, encompassing a broad and coherent body of knowledge and concepts, with substantive depth in the underlying principles and theoretical concepts » an understanding of allied knowledge and theories in related fields of work or disciplines and in the case of professional disciplines including related regulations, standards, codes, conventions. » understanding of critical approach to the creation and compilation of a systematic and coherent body of knowledge and concepts gained from a range of sources. » a comprehensive understanding of critical analysis, research systems and methods and evaluative problem-solving techniques. » familiarity with sources of current and new research and knowledge with integration of concepts from outside fields.
<p>PLO2: Interpret and apply the practices and theoretical approaches of disaster, crisis, emergency and risk management. (Understanding and Application)</p>	<p>Skills</p> <ul style="list-style-type: none"> » Technical, creative and analytical skills appropriate to solving specialized problems using evidentiary and procedural based processes in predictable and new contexts that include devising and sustaining arguments associated with a field of work or discipline. » Evaluating, selecting and applying appropriate methods, procedures or techniques in processes of investigation towards identified solutions evaluating and implementing appropriate research tools and strategies associated with the field of work or discipline. » highly developed advanced communication and information technology skills to present, explain and/or critique complex and unpredictable matters.
<p>PLO3: Develop and implement planning methods and processes for disaster, crisis, emergency and risk management. (Application)</p>	<p>Skills</p> <ul style="list-style-type: none"> » technical, creative and analytical skills appropriate to solving specialized problems using evidentiary and procedural based processes in predictable and new contexts that include devising and sustaining arguments associated with a field of work or discipline.

	<ul style="list-style-type: none"> » evaluating, selecting and applying appropriate methods, procedures or techniques in processes of investigation towards identified solutions evaluating and implementing appropriate research tools and strategies associated with the field of work or discipline. » highly developed advanced communication and information technology skills to present, explain and/or critique complex and unpredictable matters.
<p>PLO4: Examine and assess the features of national and global affairs in security and strategy. (Analysis and Evaluation)</p>	<p>Knowledge</p> <ul style="list-style-type: none"> » specialized factual and theoretical knowledge and an understanding of the boundaries in a field of work or discipline, encompassing a broad and coherent body of knowledge and concepts, with substantive depth in the underlying principles and theoretical concepts » an understanding of allied knowledge and theories in related fields of work or disciplines and in the case of professional disciplines including related regulations, standards, codes, conventions. » understanding of critical approach to the creation and compilation of a systematic and coherent body of knowledge and concepts gained from a range of sources. » a comprehensive understanding of critical analysis, research systems and methods and evaluative problem-solving techniques. » familiarity with sources of current and new research and knowledge with integration of concepts from outside fields. <p>Skills</p> <ul style="list-style-type: none"> » technical, creative and analytical skills appropriate to solving specialized problems using evidentiary and procedural based processes in predictable and new contexts that include devising and sustaining arguments associated with a field of work or discipline. » evaluating, selecting and applying appropriate methods, procedures or techniques in processes of investigation towards identified solutions evaluating and implementing appropriate research tools and strategies associated with the field of work or discipline. » highly developed advanced communication and information technology skills to present, explain and/or critique complex and unpredictable matters.
<p>PLO5: Identify and appraise the interdisciplinary implications of existing and future security threats and challenges (Application and Evaluation)</p>	<p>Aspects of Competence</p> <p>Role in Context</p> <ul style="list-style-type: none"> » can take responsibility for developing innovative and advanced approaches to evaluating and managing complex and unpredictable work procedures and processes, resources or learning » can manage technical, supervisory or design processes in unpredictable, unfamiliar and varying contexts

- | | |
|--|---|
| | <ul style="list-style-type: none">» can work creatively and/or effectively as an individual, in team leadership, managing contexts, across technical or professional activities» can express an internalized, personal view, and accept responsibility to society at large and to socio-cultural norms and relationships |
